

iOS接入指南

1、将YW_DZSBK_SDK文件夹导入到你的工程中。(注意Vendors文件夹不能在同一个工程中倒入两次)

2、调用SDK里的接口前必须先调初始化接口。

```
NSDictionary *dic = @{@"platform":@"", @"apiKey":@"", @"privateKey":@""};
[YW_DZSBK_SDK initWithDictionary:dic callBack:^(NSDictionary *dic) {
    NSLog(@"电子社保卡SDK初始化结果: %@", dic);
}];
```

3、电子社保卡使用

```
NSDictionary *dic = @{@"sourceUserId":@"",
    @"cardType":@"",
    @"cardNum":@"",
    @"userName":@"",
    @"sex":@"",
    @"mobile":@"",
    @"idCard":@"",
    @"bankNum":@"",
    @"bankCode":@"",
    @"bankName":@"",
    @"pic":@"",
    @"comTime":@"",
    @"extendedField":@"",
};
[YW_DZSBK_SDK businessProcessWithDictionary:dic viewController:self];
```

4、查询开通电子社保卡开通结果

```
NSDictionary *dictionary = @{@"sourceUserId":@"",
    @"cardType":@"",
    @"cardNum":@"",
    @"userName":@"",
    @"sex":@"",
    @"mobile":@"",
    @"idCard":@"",
    @"bankNum":@"",
    @"bankCode":@"",
    @"bankName":@"",
    @"pic":@"",
    @"comTime":@"",
};
```

```
        @"extendedField":@"  
    };  
    [YW_DZSBK_SDK openStatusWithDictionary:dictionary viewController:self  
callBack:^(NSDictionary *dic) {  
        NSLog(@"查询电子社保卡开通结果： %@", dic);  
    }];
```
